# SWIVEL CASTORS WITH SOFT FINISH

## INCORRECT USE

Please note the following are incorrect use of the castors

- The wheels and castors are used with total load which exceeds the permitted load specified in the technical data provided by the manufacturer;
- Use on an unsuitable floor surface;
- Too high ( $> 28^{\circ}\text{C}$ ) or too low ( $< 15^{\circ}\text{C}$ ) ambient temperatures;
- A device with locked wheels and castors being moved with force;
- Fixed castors being moved across the direction of travel;
- The castors are exposed to corrosive, abrasive or penetrating substances during use;
- Incorrect mechanical stress of all kinds (impact loads & mechanical shocks etc.);
- Foreign bodies being able to enter into the running surfaces;
- Wheels and castors being operated at too high a speed;
- Changes being made that have not been agreed upon with the manufacturer;
- Soft running surfaces being used on soft floors and hard running surfaces on hard floors.
